

Enterprise grade
Quality Assurance and
Software testing services

Quality Deliverance + Security Compliance would decide the fate of **Technology Adoption**

Quality Control (Verification & Validation) measures would become the CRITICAL success factor for the IT Departments & Product OEMs to

ride this tide

Key Enablers of the Adoption Journey

Quality **Deliverance**

Security Compliance

Customer Satisfaction

CHALLENGES

Adoption

For Technology Consumers

(3PLs, Manufacturers, Retailers, etc.)

Deliver on time, accurately

Bring better visibility & reduce Human Involvement

Provide more personalized customer experience

Optimize & automate operations, increase cost efficiency

For Technology Providers

(Platform & Product Vendors)

Maintain product quality across releases

Improve data security & confidentiality

Be competitive at pricing

Ensure product compatibility across **Devices & SW platforms**

IF YOU ARE WORRIED, WE CAN HELP YOU & BE YOUR QC SERVICE PARTNER

Experience

Serving IT services to **SCM Industry for** over two decades

Customer Base

Working with the global behemoths of logistics industry

Domain Knowledge

Have 500+ ready test scenarios on **SCM** processes

Testing Competence

Have ISTQB Certified Test Professionals for Agile dev.

WHAT YOU NEED IS A COMPREHENSIVE TESTING STRATEGY

User Interface

Leverage GUI and web automation frameworks like selenium.

Business Logic

Encapsulate logic and components to be verified with unit test suites

Data Access

Create test suites of data. Use production data validation routines.

Integration/Batch

Use test data sets with results that are well known/been manually verified.

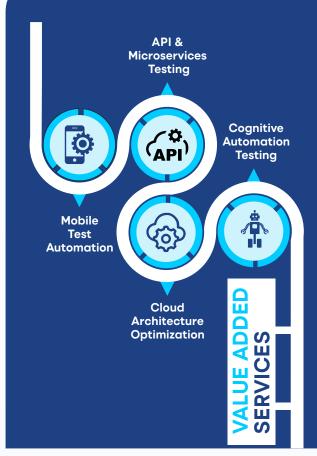

- GUI Automation Testing
- Compatibility Testing/Mobility Testing
- Accessibility Testing
- Security (Web Vulnerability) Testing
- Performance Testing
- Codified Unit Testing
- API/Micro-services Testing
- Regression (Automated) Testing
- Data Security Testing
- Data Auditing
- Integration Testing
- Transactional Stress & Load Testing
- DR Testing

TECHNOLOGY EXPERTISE

HOW WE ENGAGE

Test Strategy, Change Mgmt. & Ongoing Coaching

- Build consensus across teams
- Support managers & teams in adopting new processes
- Provide leadership support for change management
- Help in building test strategy and integrated test plans

QC Platform Implementation

Testing Tools, Environment, and Framework Creation

- Implement tools and efficient test environment mgmt.
- Create customized frameworks to streamline test automation
- Develop domain specific language (DSL) to enable end-user test script creation

QC Resourcing

Manual Testing & Reporting

- · Act as the extended testing team for the client
- Select test management tools
- Identify Test case, execute and report defects
- Provide user training on the system for UAT

QC Automation Center of **Excellence**

- Deploy testing experts as extended project team
- Design, Develop & maintain automation scripts
- Plan and schedule automation test runs for each dev. releases
- Publish bug reports & defect trend analysis reports

Managed Testing Services

- Take complete testing responsibility for client systems
- Bring in our tools & licenses
- Provide SLA driven testing services and reporting across 24X7 or 8X5
- Offer 3600 coverage of testing spectrum
